**External Parasites**

- Cattle Grubs (parasitic stages)
- Hypoderma bovis
- H. lineatum
- Horn Flies
- Haematobia irritans
- Lice
- Linognathus vituli
- Haematopinus eurysternus
- Damalinia bovis
- Solenopotes capillatus
- Mites
- Sarcoptes scabiei var. bovis

**Noromectin® Pour-On Offers Your Customers These Proven Advantages:**

- Broad-spectrum efficacy against a wide range of internal and external parasites
- A convenient pour-on formulation for ease of administration and less stress for the producer as well as the animal
- Persistent activity against important parasites
- Rapid penetration to target key parasites quickly
- A high margin of safety
- Uncompromising quality control from Norbrook Laboratories — a worldwide leader in animal health
- A competitively priced solution

**Recommend Strategic Parasite Control for Herd Protection and Profitability**

The economics of Noromectin® Pour-On for cattle, allow cow/calf and stocker operations to treat multiple times per year for improved herd health.

Observe label directions and withdrawal times. Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism. Warning: Flammable. Do not use in female dairy cattle of breeding age or in calves to be processed for veal. Not recommended for use in species other than cattle. See product labeling for full product information.
