Discover Enroflox[®]

AFFORDABLE, EFFECTIVE ANTIBACTERIAL THERAPY

Enroflox[®] (enrofloxacin) is a fluoroquinolone antibiotic designed to manage susceptible bacteria and treat disease.

Its broad-spectrum activity against both Gram-negative and Gram-positive bacteria makes it an effective treatment against many dermal, respiratory and urinary tract infections. Enroflox[®] comes in two delivery methods, Enroflox[®] (enrofloxacin) Injection for Dogs 2.27% and Enroflox[®] (enrofloxacin) Chewable Tablets for dogs and cats, giving you flexibility to better care for your patients. And it has the same active ingredient as Baytril[®] products, so you get the same indications with increased client savings – and increased clinic profit.

Broad-Spectrum Activity

Enrofloxacin has excellent activity against both Gram (+) and Gram (-) susceptible bacteria

Gram (+) Aerobes

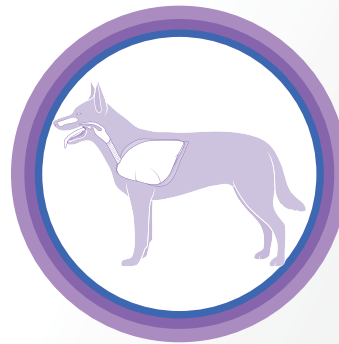

- *Staphylococcus*
- *Streptococcus*

Gram (-) Aerobes

- *E. coli*
- *Bordetella*
- *Brucella*
- *Klebsiella*
- *Pasturella*
- *Pseudomonas*

Most strains of these organisms were found to be susceptible to enrofloxacin *in vitro* but the clinical significance has not been determined for some of the isolates.

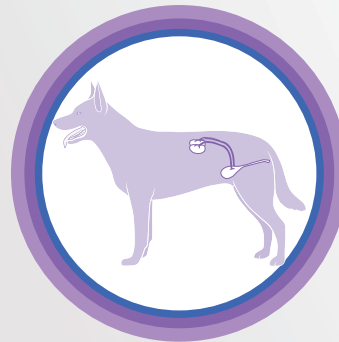

Enroflox[®] attacks susceptible bacteria at the infection site.

Respiratory

- *Staphylococcus aureus*
- *Escherichia coli*

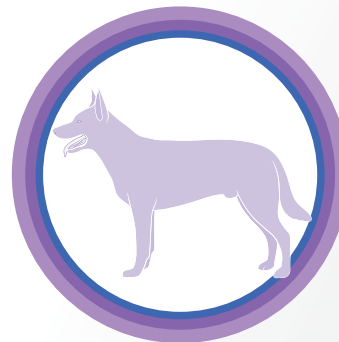

Treatable in dogs with **Enroflox Injection** and **Enroflox Chewable Tablets**

Urinary

- *Escherichia coli*
- *Proteus mirabilis*
- *Staphylococcus aureus*

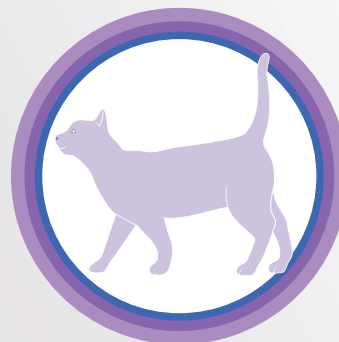

Treatable in dogs with **Enroflox Injection** and **Enroflox Chewable Tablets**

Dermal

- *Staphylococcus intermedius*
- *Escherichia coli*
- *Klebsiella pneumoniae*
- *Proteus mirabilis*

Treatable in dogs with **Enroflox Injection** and **Enroflox Chewable Tablets**

Dermal

- For wounds and abscesses
- *Pasteurella multocida*
- *Staphylococcus aureus*
- *Staphylococcus epidermidis*

Treatable in cats with **Enroflox Chewable Tablets** only

Lower your costs and pass on the savings.

Enroflox[®] Chewable Tablets

(enrofloxacin)

Impactful antibiotic activity in a liver-flavored chewable tablet

Enroflox[®] (enrofloxacin) Chewable Tablets is a fluoroquinolone that manages a variety of susceptible bacterial infections. The double-scored chewable tablet design allows for easy, flexible dosing with the same efficacy as Baytril[®] (enrofloxacin) Taste Tabs[®] at a better cost, allowing you to boost clinic profits and pass savings on to your clients.

- Indications for both dogs and cats
- Liver-flavored
- Same active ingredient and dosing regimen as pioneer product
- Significant savings versus Baytril Taste Tabs
- Once-daily, flexible dosing for dogs of 5-20 mg/kg (2.27-9.07 mg/lb). Administer once daily for cats at 5 mg/kg (2.27 mg/lb) of body weight
- Double scored with a unique, geometric design for accurate dosing
- Concentration dependent and bactericidal
- Available in 22.7 mg, 68 mg & 136 mg strengths
- Uniform 50 count and 200 count bottles across all 3 strengths

Enroflox[®] Injection

(enrofloxacin) For Dogs 2.27%

The same effective antibiotic in an easy-to-use injection form

Enroflox[®] (enrofloxacin) Injection for Dogs 2.27% offers broad-spectrum antibiotic activity against Gram-negative and Gram-positive bacteria to manage a variety of susceptible bacterial infections in dogs. This injectable form is easily administered as a single dose, followed by Enroflox (enrofloxacin) Chewable Tablet therapy.

- Indicated for dogs only
- Same active ingredient and dosing regimen as Baytril (enrofloxacin) Antibacterial Injectable Solution 2.27%
- Significant savings versus Baytril Injectable
- Each mL of injectable solution contains 22.7 mg of enrofloxacin
- Initial treatment administered intramuscularly as a single dose at 2.5 mg/kg
- Concentration dependent and bactericidal
- Available in 20 mL, 50 mL & economical 100 mL bottles to fit any practice
